

Ottawa, Week by Week

Echoes of Victory
Since the Rt. Hon. Louis St. Laurent has become the leader of the Liberal party and shortly to succeed Premier King shortly as prime minister, probably by the time of the 1948, observers along Parliament Hill have been hearing a great deal about a possible understanding developing between Premier Dugless of Quebec and Premier Drew of Ontario, if the latter should throw his hat into the ring to take over the leadership of the Progressive-Conservative party at the coming national convention, here in September.

Such a possibility, it is known here, would have far reaching effects, since it must admit that Mr. Dugless scored a victory making victory in federal provincial election there and it was, in reality, a landslide. In fact, Mr. Drew was entrenched in Ontario following the recent test there. As a result, such a political combination may prove effective in federal political arena of a kind that would have far reaching impacts throughout this country.

Then again, an understanding of this sort may bear watching, observers stress, because of its possible relation to Dominion-Provincial relations, which have not been the best possible since the Dominion-Provincial Conference of 1945-46, with the consequent threat of a crisis of double taxation, because of the failure of the federal and certain provincial governments in reaching accord. If such an understanding should develop as rumored possible along Parliament Hill now, chances of such an understanding between present regimes are not considered to be any too good.

This is Unusual
It is learned officially in this capital that normally, retail sales across Canada begin to recede in the half-way mark of the year, since, when the summer season, a sharp downward swing in such businesses gets under way. However, a nation wide survey has shown that this did not occur this year, and it is apparent that the masses have spent more money in the stores than usual this year, with buying better than generally believed likely. In other words, this can be said to be indicative of a "boom" in business, the retail level, in face of the high prices for commodities. It looks like the "hot man" in the market is in his hands, and he is cashing in.

Measuring High with the Young Crowd
Holidays or school days—Eaton's have grown up with EATON'S. Young brothers and sisters are regular customers. Too, and parents approve the prices and the way things like washability are taken by EATON'S Research Bureau.
Right now, with an exciting new school year just a matter of weeks away, we have all sorts of suggestions for Young Canada. Check with the catalogue, and you'll see what's Hot!

EATON'S

Discusses Books

Aurum L. Packer, Professor of English at McGill University, who gives his impressions of current best sellers, old literary favorites and their authors, in a series of weekly talks about books and people. He is heard Wednesday at 8:15 p.m. on CBC, 215 p.m. on CFTY. For three decades Professor Packer has been teaching English literature in Canadian universities, and is a popular reviewer and author, as well.

spending it with the help of the "little woman".
In fact, turning back to the Canadian government's report, it is learned that retail sales advanced 15.3 per cent in dollar value during June this year, compared with a year ago in this period, and this is impressive in face of the higher prices, because one would believe that the higher prices would mean a "layoff strike" and keep sales much lower. Examining these results, it is discovered that where the increase was the most marked did not always involve necessities. This and this confirms the above impression about spending that aids the inflationary boom.

The largest gain in June was in retail sales of women's wear, of 22.5 per cent, and other increases included 22.8 per cent for department stores, 19.1 per cent food stores, 15.5 per cent general stores, 14.2 per cent general country stores, 12.7 per cent family clothing stores, 12.1 per cent hardware stores, 12.1 per cent men's clothing stores, 8.6 per cent jewelry stores, etc., with these in many instances indicating the trend of the times, and proving quite amazing in the light of loud complaints about prices.

New Activities
It is evident that Canada's political parties will soon start to organize in Newfoundland, in preparation for the old colony becoming the 10th province, and already there are signs of such activities being prepared, with the indications that Liberals, Progressive-Conservatives, C.C.F. and Social Credit will engage in election in the province, and just as soon as the opportunity will permit. Since Joseph Smallwood and F. Gordon Bradley, attended the national Liberal convention here recently as observers, it is believed that similar invitations to be observers will be extended to representatives of Newfoundland to the Progressive-Conservative convention here in September. The C.C.F. had also extended such invitations.

When arrangements for conference here have been completed, it is held that the seven-by-eight party for M.P.'s may be held here with an unofficial test in Newfoundland. Under the British North American Act, Newfoundland would get such seats in Commons and in Senate, raising Canada's House of Commons to 262 seats and the Senate to 102. It is forecast these elections will be held in the middle of next year.

Poultry Statistics
Production of eggs in Canada in 1947, totaled 402,474,000 dozen. Domestic consumption totaled 302,485,000 dozen or a little over 26 dozen per capita.

SOCCERS WIN FOURTH ELECTION

Alberta's Social Credit government was returned for its fourth term of office in the election of Tuesday, August 17. Incidentally, the premier, E. C. Manning, received the largest number of votes ever recorded for a candidate in the province, a total of 19,486.

While the result was not entirely unexpected, since the government candidates undoubtedly were backed by Conservative interests terrified of the Socialist aims of the C.C.F., still it was disappointing in many respects. A strong opposition would have had a sobering influence on government ranks; nor would campaign promises for the welfare of the electorate as a whole, be allowed to be forgotten as has been the case in the past.

At present standing with 50 seats in the legislature, the Social Credit party can clearly claim a mandate from the people. As regards the opposition, there can be no alibis. They were badly beaten, in spite of having worked hard and spending a good deal of money. Indeed, so enthusiastic did some supporters become that, for the second election in a row, they freely forecast that Mr. Roper would be Alberta's new premier.

And now? Ernest has taken over the reins. Let us draw the veil.

Local and District Poll Station Results

The following are the results of votes cast in local district poll stations, as reported by deputy returning officers.

Conservative	Liberal
Rainbow	15
Verdant Valley	28
Wright	23
Delia	116
Starland	16
Kelvinville	33
Sentinel Hill	34
Victor	10
Farrell Lake	15
Lloyd George	9
Hanna	191
Sunbeam	43
Morfin	61
Rumsey	50
Mitchell	28
Gartley	48
Munson	67

Spilled ballots have been reported from these polls. In the case of Delia, the number was 21; at Sentinel Hill, 6; and at Morfin, the number was 40. In connection with these irregularities are alleged to have occurred at quite a few polling stations, although it may be, perhaps, more charitable to assume that they may be ascribed more to inexperience than to design.

Shower For Bride-Elect

On Friday, July 13th, at the home of Angus McKay, a shower was held in honor of Miss Irene Hoover, a bride-elect of this week.

Over 60 ladies were present to pay tribute to the popular lady. Mrs. E. L. Linger had charge of the proceedings and everyone had an enjoyable time.

There was a short program. The Marshall sisters entertained with two duets, and Mrs. Florence Hands originated a short sketch titled, "Foolish Questions and Answers." The gifts were in an exquisitely decorated box, brought in by Miss Hoover's class. Mrs. J. L. Linger had charge of the gifts, while Mrs. Margaret Bunn and Miss Marion Hoover assisted the guest in unwrapping and displaying the gifts. The

DELIA BRANCH OF CANADIAN LEGION RE-DEDICATION SERVICE

The Canadian Legion, Delia Branch No. 61, held a re-dedication ceremony at the local camp on Sunday, August 16. The event was supervised by Wm. Newman, president of the Legion.

Rev. Canon Winter, of Hanna, officiated at the service, assisted by Mr. York, first of Rowley. Major J. L. Newman, president of the Legion in Delia, unveiled a plaque in honor of the men of the district who fell in World War I.

Wm. Gibson, mayor of Delia, paid tribute in a well prepared address to those who passed on.

Floral offerings were presented by representatives of the Ladies Auxiliary, Delia; the Drumhead Branch, Canadian Legion; Women's Ministry Society; Ladies Aid; U.F.W.; Majestic and Farrell-Lake W.I.; Catholic Women's League, and Delia and Community Board of Trade.

A member of each of the three services formed a guard of honor during the ceremony, and placed wreaths upon the cenotaph on behalf of each service.

Mrs. Austin Whitman sang a solo which was well received. Placed poppies below the plaque. Comrade Fred Orniston supplied hand music for the march over his public address system.

An ideal aided in making the ceremony a well attended occasion.

Australian Court Declares Bank Bill Unconstitutional

Following the decision of the Australian High Court that the Nationalization of Banks Bill, as passed by the Australian Federal Parliament, was unconstitutional, the president of the Canadian Bankers' Association made the following statement:

"While the constitutional relationship in regard to banking in Australia is not on all fours with Canada, the principle of the principle on which the judgment was based is common to both countries. This is, that government control of commercial banking jeopardizes its present impartiality, and potentially interferes with freedom of commerce. That principle applies equally to Canada. Once bank credit is made subject to steering or direction based on political considerations of a party in power, or even opened to that possibility, freedom of commerce or of any kind of free enterprise is destroyed. Availability of bank credit does not now depend even to the slightest degree on political credit or social credit. It never should. In Australia, too, there was a manifest fear of political interference into the money affairs of the private individual. This fear became so potent that the Socialist government actually went so far as to write a provision into the proposed legislation. My information is that it quite signally failed to reassure the hard-headed depositors and borrowers of Australia."

Hog Grading in 1947

Hog carcasses graded in Canada in 1947 totaled 4,755,981 compared with 4,461,786 in 1946. For Canada as a whole, A grades totaled 65 per cent, and B grades 35.61 per cent.

The average dressed weight of all pigs was 165.7 pounds.

Searle Precipitation Report

No. 15
Compiled from the rain records of 659 Governmental and Searle Rain Gauges from July 1 to July 31, including August 1st, 1948.

The total moisture condition of the three prairie provinces during the past week has declined to 1 per cent, the condition now standing at 101 per cent of normal, compared with 102 per cent last week and 85 per cent of normal in Saskatchewan and 126 per cent of normal in Manitoba.

The total moisture condition for Alberta is now 100 per cent of normal, for Saskatchewan 96 per cent, and for Manitoba 115 per cent.

From April 1st to August 9th, the seasonal rainfall has been 94 per cent of normal in Alberta, 77 per cent of normal in Saskatchewan, and 126 per cent of normal in Manitoba.

In Alberta Crop Districts 1, 3, 5, 7, 8, 10, 11, 13, 14, and 17 have received less than normal rainfall from April 1st to August 9th, whereas Crop Districts 2, 4, 6, 9, 12 and 16 have received better than average precipitation.

In Manitoba Crop District No. 4 has received less than average precipitation, all other Crop Districts having enjoyed considerably better than normal precipitation.

The Searle estimate of wheat production is 325 million bushels, although the threshing machine may disclose different figures, owing to the patchy and uneven nature of the crop. This estimate is quite a little below what the rain should warrant, the reason being, as we have said before, that the rain was most unevenly distributed during the growing season, there having been a partial drought from June and June and up to July 10th.

Hay has been reported to be cutting on the Winnipeg market with a floor price of \$4.00.

FARMERS DO Your Summerfallowing the Modern Way use a MASSEY-HARRIS Front-Mounted Sprayer and Agricultural Weed-No-More 2, 4-D For Complete Information see W. D. Fitzsimmons Your MASSEY-HARRIS Dealer DELIA, Alberta. Phone 24

An Unjust Subsidy For two years prairie farmers have been obligated to subsidize all the people of Canada with cheap bread and flour, losing over \$1.00 a bushel on approximately 70 million bushels each year. Farmers, we suggest, should protest to their Members of Parliament against the continuance of this unjust subsidy. SEARLE GRAIN COMPANY, LTD.

Recruits Are Being Sought For Services

OTTAWA.—The defence department will launch a recruiting campaign for all three services, both active and reserve forces, on Sept. 1. Defence Minister Chretien announced that the campaign will be marked by a series of "major events" and will continue on throughout the winter.

Present strength of the three armed forces is roughly 100,000 and no definite target is being set. "We will take all we can get as long as they meet our qualifications," Mr. Chretien said at a press conference.

The minister said he would officially open the Royal Military College at Kingston Sept. 29 on a post-war basis as a training ground for future officers of all three services.

He also said that the Canadian Forces would open the same day on a full-service basis.

The 100 would be chosen from 200 who were selected out of the 400 for further tests.

Both R.M.C. and Royal Roads would, for the first two years, have a quota of 100 each.

At the same time, the Canadian Forces would open the same day on a full-service basis.

The minister said that the Canadian Forces would open the same day on a full-service basis.

Careless Pilot Causes Many Plane Accidents

The following article appeared in *Canadian Aviation*. The report of civil aircraft accidents in Canada during 1967 makes reading.

There were 278 accidents involving Canadian aircraft, an increase of 101 from the previous year. Of the 278, 141 were fatal and 137 were non-fatal.

It is impossible to calculate but it is estimated that the total loss of life in 1967 was 141. It is also estimated that the total loss of property was \$1,410,000.

The most common cause of accidents was pilot error, which accounted for 141 of the 278 accidents. This was followed by weather, which accounted for 137 accidents.

The following are the most common causes of accidents: 1. Pilot error, 2. Weather, 3. Air traffic control, 4. Terrain, 5. Engine failure, 6. Fuel system, 7. Landing gear, 8. Maintenance, 9. Communication, 10. Navigation.

The following are the most common types of accidents: 1. Controlled flight into terrain, 2. Loss of control, 3. Collision, 4. Engine failure, 5. Fuel system failure, 6. Landing gear failure, 7. Maintenance failure, 8. Communication failure, 9. Navigation failure, 10. Weather-related accidents.

The following are the most common locations of accidents: 1. Over water, 2. Over land, 3. In flight, 4. On the ground, 5. In the vicinity of airports, 6. In the vicinity of navigational aids, 7. In the vicinity of communication facilities, 8. In the vicinity of weather reporting stations, 9. In the vicinity of terrain features, 10. In the vicinity of obstacles.

The following are the most common times of accidents: 1. During takeoff, 2. During climb, 3. During cruise, 4. During descent, 5. During landing, 6. During taxiing, 7. During parking, 8. During maintenance, 9. During communication, 10. During navigation.

SIX DIE AS BRIDGE FALLS IN RAPIDS—Six employees of the Ontario Hydro-Electric Power commission who plummeted 150 feet into the Ottawa river again at two machines were drowned. The collapse of a 110-foot section of a Bailey bridge sent the men to their death. The men drowned near the spot where four workmen died when a catwalk crashed last November. A three-ton-deep hole eight feet long in the concrete marks the spot where Robert Harrell is standing on the Bailey bridge structure which buried the men to their death in the Ottawa river when it collapsed. An hour before it gave way he was standing there.

BRITISH PLAN TO PURCHASE 25 CANADIAN NORTH STARS—The decision of the British government to buy 25 Canadian-made North Star 50-passenger planes was hailed in Ottawa as one of the great landmarks in Canadian industrial development. The order is valued at \$14,000,000. It is a tremendous compliment to the Canadian aircraft industry, one authority said. Forty passengers and a crew of six can be carried by the big Canadian

North Star planes whose pressurized cabins enable them to fly at 20,000 feet. Here is one of the T.C.A.'s North Stars, powered by four engines, above Montreal airport. The U.K. decision to abandon the "Buy British" policy for British Overseas Airways Corp. came after "exceedingly disappointing" trials of British-built Tudor. It is expected the first Montreal-built Canadian will be delivered to Britain within eight months, 15 in a year.

HE ANGLER GETS 25-POUND LUNGE—John E. Barrett, 70-year-old veteran of the South African war, displays the 25-pound lunge he caught while fishing near Campbellford, Ont.

TWENTY-NINE DIE IN CANADA'S WORST AIR DISASTER—The worst disaster in Canadian aviation, the crash of a Binswaki Airlines plane cost the lives of 26 men, two women, and a baby. The aircraft crashed into the cliff at Pine River on the Ganges peninsula and exploded. Pig had died in after the plane left Anticosti Island and the pilot, Emerson Mills, tried to slip through this gap in mountainous coast.

BUILDS SET—Fred Parde, of Chatham, Ont., the builder of a television set, looks forward to earning big money in television engineering in the United States. His other achievements are carpentry work and custom-built radio sets. Above Fred is shown with his television set.

GIRL BLAIN, HUSBAND ACCUSED—A heart-broken father, his gay and pretty daughter died, promised bravely to "do anything I can" to help the youth accused of the girl's murder. "My Blain is dead," grieved 31-year-old Louis Toebert, of Port William, Ont. "She is lost now. I don't want to see Johnny die too. He is a good boy. I don't want to see another death." John D. Gorman, 26, and Elsie Toebert, 21, were married a year ago. She was found dead in their small apartment and within two hours the young husband had been formally charged with her murder and remained in custody. No motive was disclosed.

LOVE SPANS OCEANS ... BY MAIL AND AIR—In Canada from Ireland is Rose McFarland of Belfast, who flew over to join her husband-to-be, Robert Glas of Hastings, Ont., a 34-year-old machinist. He saw her picture in a Belfast paper two years ago, wrote a proposal. She accepted and here she is.

ROWING IS FUN, says Diane Gayder, 17, and she says she never felt better in her life. There has been controversy over whether rowing is too strenuous for girls. Diane is stroke of the senior eight and is also member of St. Catharines junior city council.
